

Enviroscientists, Inc. provides a variety of biological resource services for our clients in the mining, energy, utility, land management, and government sectors. These services include botanical and wildlife field surveys, Biological Assessment and Biological Evaluation (BABE) preparation, Section 7 consultation, and environmental permitting, mitigation, and planning. The Reno and Elko, Nevada office locations provide our staff convenient bases to serve clients with projects located throughout California, Nevada, and other parts of the Western U.S.

Nesting Surveys**

**Reclamation Release
Criteria Vegetation
Surveys as Required
by Nevada & California
Agencies**

**Baseline
Botanical
Surveys**

**Sensitive Species Plant
Surveys
Vegetation Community
Mapping**

**Baseline Wildlife Surveys, including
Species Inventories Required on National
Forest System Lands**

**Transect Measurements of Plant Density, Species
Richness & Percent Cover**

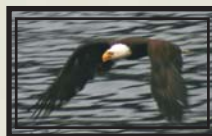

**Reclamation
Reseeding
Services**

Pre-Field Survey Reports & Survey Reports

**Special Status Species
Surveys for Desert
Tortoise, Pygmy Rabbits,
Greater Sage-Grouse,
Raptors, and Bats**

**Botanical Material
Collection & Sampling
for Lab Analysis
Sensitive Plant Species
Research & Consultation
with UNR Herbarium
Faculty**

**Noxious Weed and Invasive
Species Surveys & Noxious
Weed Removal, Mitigation &
Risk Assessment**

**Increased Field Survey Efficiency Utilizing
Geographical Information Systems (GIS) Analysis
of Vegetation Community and Habitat Mapping
Data & Potential Wildlife Habitat Data**
